

A teaching resource for Stage 4 Geography

# The Blue Mountains

## A Geography of a World Heritage Site

The kit contains the following:

- **30 full colour Broadsheets** (equal to 6 x A4 pages) which include many photographs, an aerial photograph, topographic map, transect and a range of tables and graphs.

These are high quality broadsheets that can be used for teaching many essential Geography tools and World Heritage.

- **A teaching kit of photocopiable blackline masters** containing student exercises based on the broadsheet, along with exercises that can be a unit of work on World Heritage and the Blue Mountain's environments and communities.

These activities and exercises have been written for both the current and new syllabus and can stand alone as individual lessons. These and additional exercises come on a computer disk to provide flexible use by teachers.

- **A sample skills based multiple choice test** on the broadsheet that can be used as an assessment item for Stage 4 students or as practice for other years.

- **Excursion/Field Work** suggestions and activities to meet the needs of a variety of school situations and requirements of Topic 1 Stage 4 Geography.

WESSSTA is proud of the quality and value of this resource and are offering it to members at below cost recovery. The broadsheets alone generally sell for more than the total cost of the kit to members.
