

Announcing an exciting teaching resource

## A Geography Kit Produced by :

# Penrith Lakes Scheme

The kit contains the following:

- **30 full colour double-sided A3 Broadsheets** with scheme photographs, aerial photographs, a full page structure plan map and a range of diagrams and graphs.

These are high quality broadsheets that can be used for teaching many essential Geography skills.

- **A teaching kit of photocopiable blackline masters** containing student exercises based on the broadsheet, along with exercises that can be a unit of work on the Penrith Lakes Scheme and its changing environments and communities.

These activities and exercises have been written for the syllabus and can stand alone as individual lessons.

- **A sample skills based test** on the broadsheet that can be used as an assessment item for Stage 5 students or as practice for Senior Geographers.

WESSSTA is proud of the quality and value of this resource and are offering it to members at below cost recovery through the great support of Penrith Lakes EEC. The broadsheets alone generally sell for more than the total cost of the kit to members.

**Look out for a 2007 DVD update to accompany this resource (or stand alone).**
