

Announcing a new (2006) teaching resource for Stages 5 & 6 Geography

Floodplain Wetlands of the Hawkesbury-Nepean

- Land and Water Management
 - River Regulation
 - Freshwater Ecosystems at Risk

This kit is the most ambitious and best value resource yet undertaken by WeSSSTA and will contain the following:

- **30 full colour Broadsheets** (equal to 6 x A4 pages) which include many photographs, an aerial photo, topographic map, weather maps and a range of diagrams, tables and graphs. These are high quality broadsheets that can be used for teaching many essential Geography tools in Stages 5/6
- **A teaching kit of photocopiable blackline masters** containing student exercises based on the broadsheet, along with stand alone lessons on a range of issues associated with the floodplain. These and additional exercises also come on a computer disk to provide flexible use by teachers.
- **A CD Rom containing multimedia** Powerpoint presentations on the Middle Hawkesbury-Nepean and on Floodplain Wetlands, as well a wealth of other information in PDF format for classroom use.
- **A number of skills based multiple choice items** on the broadsheet that can be used to develop an assessment tasks for Stage 5 & 6 students.
- **Excursion/Field Work** suggestions and activities based around the area covered by the broadsheet.
- *Now with two special bonus discs - "Exploring The Nardoo" to allow the exploration of a virtual river over time and to access a huge range of multimedia resources; and **River Floodplain DVD** , with 6 presentations on the study area and issues.*

WESSSTA is proud of the quality and value of this resource and are offering it to members at cost recovery. The broadsheets alone generally sell for around \$60; while the Nardoo CD, produced by University of Wollongong, normally retails for around \$200
